# Heed wake-up call for world: Goodall

By **CHEE CHEE LEUNG**  
SCIENCE REPORTER

SHE is described variously as a scientist, a conservationist and a primatologist. But Jane Goodall has one simple label for the state of the Earth: a mess.

Overpopulation, pollution and the reckless use of fossil fuels, she says, are just some of the things that are poisoning the planet and threatening its creatures.

But despite the bleak outlook for the world, the 74-year-old Briton is encouraging people not to despair. "There's hope for the future, but only if we all play our part," she says.

Best known for her work with chimpanzees in Africa, Dr Goodall is in Melbourne as part of an Australian tour, speaking about worldwide efforts to save critically endangered species from extinction.

At Melbourne Zoo yesterday, she shared centre stage with the resident gorillas to help launch a mobile phone recycling campaign that will

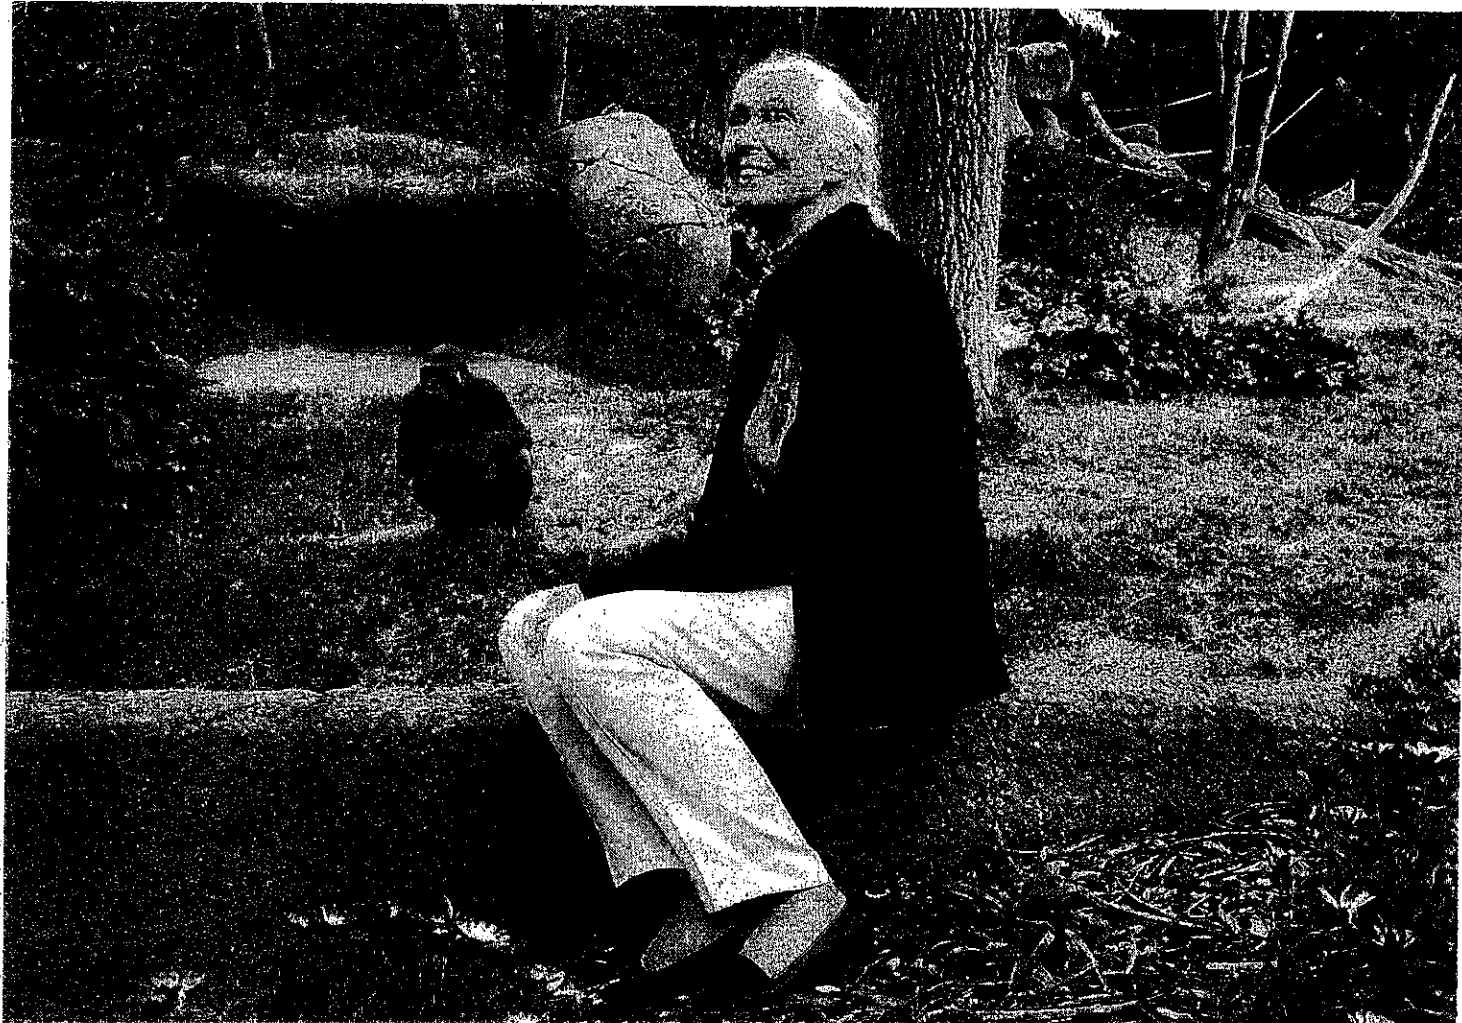

raise money for the primate conservation work carried out by the Jane Goodall Institute in Africa. It is hoped the program will also lessen demand for coltan, a metal part for mobile phones that is mined in the Congo River basin and contributes to forest loss, affecting the habitat of threatened mountain gorillas and other animals.

"An awful lot's gone, but if we don't take care, an awful lot more will go until there's nothing left," she says.

Dr Goodall also said this week's release of the Red List of Endangered Species by the International Union for Conservation of Nature should serve as "a wake-up call for action" to help protect the world's most vulnerable species. That list showed that 25% of the planet's mammals are under threat, with Australian mammals the most at risk in the developed world.

## **JANE GOODALL'S VISIT TO MELBOURNE**

(The Age Thursday 9<sup>th</sup> October 2008)

1. Write the headline of the newspaper story and then write the meaning.

2. Look at the photo and read the caption. Copy it down.

3. How many paragraphs are there?

4. Read paragraph 5, then finish the sentences.  
Jane Goodall was at Melbourne Zoo to help \_\_\_\_\_

\_\_\_\_\_ that will  
\_\_\_\_\_ carried out by  
\_\_\_\_\_.

5. What is coltan and where is it mined?

6. What does the mining contribute to?

7. Write down the two websites and look at them in computer class.

## **JUMBLED PARAGRAPHS**

### **Listen to the wake-up call for the world**

She says that some of the things that are poisoning the earth and threatening animals are overpopulation, pollution and the careless use of fossil fuels.

She was photographed at the Melbourne Zoo yesterday to help start a mobile phone recycling program. The program will raise money for the Jane Goodall Institute in Africa which helps protect animals in danger. The program will also recycle the metal coltan that is used in mobile phones. Coltan is mined in the Congo. The mining is destroying the forest habitat of the mountain gorillas and other animals.

Jane Goodall has described the Earth as in a bad way.

"An awful lot's gone, but if we don't take care, an awful lot more will go until there is nothing left," she says.

Dr. Goodall is best known for her work with the chimpanzees in Africa. She is now in Melbourne as part of an Australian tour. She is speaking about worldwide efforts to save animals that are in danger of extinction.

This week a list made by the International Union for Conservation of Nature showed that 25% of the world's mammals are in danger. Australia's mammals are the most at risk. Goodall says that this is "a wake-up call for action" to protect these mammals.

Jane Goodall was born in Britain and is now 74 years old. She says, "There's still hope for the future, but only if we all play our part."

## CLOZE

### Listen to the wake-up call for the world

Jane Goodall has \_\_\_\_\_ the Earth as in a bad way.

She says that some of the things that are \_\_\_\_\_ the earth and \_\_\_\_\_ animals are overpopulation, \_\_\_\_\_ and the \_\_\_\_\_ use of fossil fuels.

Jane Goodall was \_\_\_\_\_ in Britain and is now 74 years old. She says, "There's still hope for the \_\_\_\_\_, but only if we all play our part."

Dr. Goodall is best \_\_\_\_\_ for her work with the \_\_\_\_\_ in Africa. She is now in \_\_\_\_\_ as part of an \_\_\_\_\_ tour. She is \_\_\_\_\_ about worldwide \_\_\_\_\_ to save animals that are in danger of \_\_\_\_\_.

She was \_\_\_\_\_ at the Melbourne Zoo \_\_\_\_\_ to help start a mobile phone \_\_\_\_\_ program. The program will \_\_\_\_\_ money for the Jane Goodall Institute in \_\_\_\_\_ which helps protect \_\_\_\_\_ in danger. The \_\_\_\_\_ will also recycle the \_\_\_\_\_ coltan that is \_\_\_\_\_ in mobile phones. Coltan is \_\_\_\_\_ in the Congo. The mining is \_\_\_\_\_ the forest \_\_\_\_\_ of the \_\_\_\_\_ gorillas and other animals.

"An \_\_\_\_\_ lot's gone, but if we don't take \_\_\_\_\_, an awful lot more will go \_\_\_\_\_ there is \_\_\_\_\_ left," she says.

This week a \_\_\_\_\_ made by the \_\_\_\_\_ Union for Conservation of \_\_\_\_\_ showed that 25% of the world's \_\_\_\_\_ are in danger. Australia's mammals are the most at \_\_\_\_\_. Goodall says that this is "a wake-up call for \_\_\_\_\_" to \_\_\_\_\_ these mammals.

**EXERCISES Listen to the wake-up call for the world**

1. Write these words next to their meaning.

overpopulation	despair	recycle	mess	habitat
lessen	label	extinction	mined	fuel

reduce or cut back	
using again	_____
too many people	_____
give up hope	_____
dirty and not good	_____
dug out of the ground	_____
place where animals live	_____
a name	_____
oil, gas and coal	_____
dying out for ever	_____

2. Match a word from box A with a matching word from box B.

<b>Box A</b>	
recycling	endangered
mountain	mobile
fossil	wake-up
under	

<b>Box B</b>	
call	gorillas
phones	campaign
fuels	threat
species	

_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

3. Circle the full stops, capital letters and 10 spelling mistakes then write the corrected paragraph.

jane goodall was photographed at the melborne zoo yesterday to help start a mobile phone recycling program the program will raise monney for the jane goodall institute in africa which helps protect animals in danger the program will allso recycle the metil coltan that is used in mobile phones coltan is minned in the congo the mining is destroying the forest habatat of the mounatin gorillas and other animals

---

---

---

---

---

---

---

---

---

---

---

4. Match the sentence beginnings with the correct endings.

Jane Goodall has described	and is now 74 years old.
Jane Goodall was born in	mined in the Congo.
She is known for her work	as part of an Australian tour.
She is now in Melbourne	the most at risk.
Coltan is	with the chimpanzees in Africa.
Australia's mammals are	the Earth as in a bad way.

5. Circle each word then write the sentence again.

Anawfullot'sgone, butifwedon'ttakecare, anawfullotmorewillgountilther eisnothingleft.
